## Introducing our Asia new delivery system - connects you faster, easier and better around the world.

### Experience fast, faster and fastest delivery in Asia with our new hub

Something new is here to give you and your work a buzz! You can now experience fast, faster and fastest delivery with our new hub in the Philippines. With the hub, you are connected more easily to customers in major cities in Asia and beyond.

Our worldwide network of services is here to serve you better. This means improved service range, later pick up times and faster deliveries. We call this Asia's new delivery system. Whether you are shipping just across Asia or around the world to the more than 200 countries UPS serves, we're on top of it.

### More and better services at your fingertips

You now have more choice with the addition of two new delivery services that will make your work easier. When you need faster delivery from [city] to [city] or all the way to London by 10.30am (please check timing correct), UPS Worldwide Express™ delivers. So your product samples are there when your client arrives at your office. For an industry-first fastest early morning delivery from [city] to [city] or all the way to New York (check whether appropriate) by 8.30am, UPS Worldwide Express Plus™ ensures that your urgent contract makes that breakfast meeting.

When you have important but less-urgent shipments, UPS Worldwide Expedited™ is a time-definite, cost-effective delivery mode that offers door-to-door, customs cleared delivery that

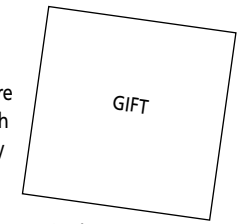

takes as little as three business days from Asia Pacific to major business centres in Europe, North and South America, and Asia.

Prepare and stay in touch with your shipments via a range of UPS Technology: UPS OnLine™ WorldShip™ software or at [www.ups.com](http://www.ups.com). Click on to a range of powerful features such as up-to-date country-specific UPS services information e.g., rates, shipping transit times, delivery status and signature tracking.
